**Come to the Concert:****\$10.00**

Come to the Concert is a series of courses based on the current (2024-25) Kamloops Symphony Orchestra season. The aim of the classes is to prepare for each of the Symphony's performances, both the orchestral and the chamber concerts, as well as to increase our familiarity with all aspects of classical music. We explore background to the composers and their times and to the works that will be performed, and we listen to excerpts from the pieces to get a sense of the distinctiveness of their structure and style. There is opportunity to ask questions, express opinions, discuss previous concerts, and explore aspects of classical music performance. The first Come to the Concert class of the semester previews the work of Canadian pianist and composer Jean-Michel Blais, in a musical collaboration with Music Director, Dina Gilbert and the Orchestra. The concert brings together compositions of renowned composers such as Debussy, Britten and Rachmaninov transformed by the style of Blais' own globally celebrated works.

**Search, Recovery & Detection K9s of BC Demonstration****\$10.00**

Search, Rescue & Detection K9s (SRD K9s) is a volunteer organization whose core function is the ongoing search for missing persons in BC. All of their working K9s and their handlers are trained and held to the highest standards. Searches for missing persons conducted with individuals are labour intensive and limited in the amount of area that can be explored during the search hours. Dogs with their superior scent ability and training can easily cover more ground in less time and are more thorough as they follow the unique scent left by the individual. Mike and his dog, Ranger, will show us how these dogs are trained and how they are able to find articles left behind, do live finds, and also detect human remains and drugs. This demonstration will be taking place outdoors so weather appropriate clothing and footwear is required. Driving instructions to the demonstration site will be emailed to participants closer to the date.

**Art and Conversation: Pieces****\$10.00**

Through visual strategies that embrace humour and play, Adrian Romeo explores the human condition and reflects on her own mental and physical struggles. The central project in this new body of work is a wooden racetrack comprised of five sculptural wind-up toys that represent the artist's personal foes: depression, fatigue, chronic pain, insomnia, and self-doubt. Using her art practice to process and expose her interior world, Romeo offers visitors a space of self-reflection through interaction with her work. The viewer is invited to choose a wind-up racer to race down the track. Accompanying each racer is a card providing insight in to the mental and physical pain represented by each wind-up toy. This twisted competition of inner demons mirrors the battle that many people with physical and mental health challenges experience every day.
